## Jaisalmer Yellow

Jaisalmer Yellow Sandstone is used especially in exterior cladding in sea shore buildings due to acid & thermal resistant properties. The moisture laden saline winds have negligible effect on Jaisalmer Yellow stone. The subtle yellow color of this stone has made it much popular in European region. It is a perfect choice for adding a lively touch to the regal buildings or for large landscaping projects. Jaisalmer yellow can be availed in the form of tiles, blocks, slabs, etc. All the blocks of teakwood sandstones are carefully calibrated and cut to exact size required by the clients.
