Jodhpur Chocolate

Jodhpur chocolate sandstone is basically a dark brown colored stone / a light brown base stone with dark brown strips. The dark hues of colors create a unique pattern that makes the stone a class apart. The compact structure of the stone makes Jodhpur chocolate resistant against weathering. These sandstones make a wonderful addition to home or commercial places. They retain their original sheen even after long time exposure to harsh weather conditions. Jodhpur chocolate sandstones are tough, yet easy to work. They can be availed in variety of finishes such as natural, calibrated, honed, polished, flamed, etc.
