Mandana Red

This sandstone also known as Wine Red or Bhilwara-Red has quartz grains cemented together by secondary silica & calcite. Due to the presence of Quartz in it this is also known as Quartzitic Sandstones. Due to natural wine red color it find extensive popularity in paving and most town planners in Europe, specifically Belgium and UK, find this sandstone most useful in their old city revamping projects. The natural cleft surface also due to strong physical and chemical composition of the stone is also very smooth and riven. It is extensively used in making Huge Landscaping projects, window cills, lintels, kerbs and so on. It also finds huge popularity for being used as wall cladding and various other interior and exterior landscaping applications. This stone is particularly acid proof and does not change color or texture with acid spills etc. Therefore it is often used in industrial application also.

This material is Frost resistant and the color is fairly consistent. We try to use material from quarries where the stone does not have white spots on the surface.

The stone can be natural, sawn, sandblasted, brushed, honed and polished as per usage requirement. Available in tiles, slabs, cobbles, wall bricks and blocks, we offer mandana red Sandstone in varieties to create an interesting interiors or exteriors. The material we use comes from the area of Kasia Village, Bijolia District in Rajasthan.
