Teakwood

Teakwood is a fine grained creamish colored sandstone, which bears beautiful patterns formed by brown veins throughout the surface. The brownish color lends a wooden finish similar to that of aged wood. This sandstone gives a luxurious feel upon being used with sandblasting / bush hammered surface. Owing to the soft texture and extraordinarily smooth surface, the teakwood sandstone does not take good polish but is used extensively in making garden ornaments. These stones are also ideal for interior as well as exterior flooring in residences and commercial places. All the blocks of teakwood sandstones are carefully calibrated and cut to exact size required by the clients.

General Properties

Classification	- Sand Stone
Quarry Deposit	- Compact
Quarry Excavation	- Block
Chisel Splitting	- Not Possible
Gang Saw Sawing	- Possible
Offered in	- Steps, Palisades, Block, Slab and Tiles
Finishes Offered	- Sawn, Sandblasted, Honed, Polished, Brushed, Bushhammered, Vibrated, Tumbled
